

Phonic Pronunciation

Phonics is a way of teaching reading. When learning how to read using phonics, your child will be taught:

1. How sounds are represented by written letters. For example, they will be taught that the letter 'm' represents an *mmm* sound.
2. How sounds can be blended together to make words. For example, they will be taught that the sounds of the letters 'c-a-t' blend together to make the word 'cat'.

In order to do this it is essential that children correctly pronounce the different phonemes.

Please watch the following link to find out how to correctly pronounce different phonemes.
